

# WebPanda

## Product Warning

### Installation Instructions

First you will need to create this directory structure within your Magento root directory: **app/code/WebPanda/ProductWarning/**.

After the directory structure is created, unpack the .zip file you have downloaded from Magento Marketplace or from WebPanda website inside **app/code/WebPanda/ProductWarning/**.

After the files are unzipped, run the following commands on Magento root directory:

- First determine the mode that your Magento is running on, by running the following command:

```
php bin/magento deploy:mode:show
```

- If you are in **developer** or **default** mode, run the following commands:

```
php bin/magento module:enable --clear-static-content WebPanda_ProductWarning
```

```
php bin/magento setup:upgrade
```

```
php bin/magento setup:static-content:deploy -f
```

```
php bin/magento cache:flush
```

- If you are in **production** mode, run the following commands:

```
php bin/magento maintenance:enable
```

```
php bin/magento module:enable --clear-static-content WebPanda_ProductWarning
```

```
php bin/magento setup:upgrade
```

```
php bin/magento setup:di:compile
```

```
php bin/magento setup:static-content:deploy
```

```
php bin/magento maintenance:disable
```

```
php bin/magento cache:flush
```

If you do not know how to install an extension or you wish a professional to do it for you, we offer additional Installation service for a small fee.
